

Gillespie Precast National Concrete Products acquisition, extends its range of precast solutions

FOR IMMEDIATE RELEASE

Chestertown, Maryland—August 3, 2013

With the Gillespie Precast acquisition of National Concrete Products (NCP), the company solidifies its position as the premiere precast solution provider in the Maryland, Delaware, Virginia, and Washington D.C. Chesapeake Bay area. “The NCP location in Greenwood Delaware becomes our 3rd plant to further serve the Delmarva region.” according to Jim Talbott, Vice President General Manager, Gillespie Precast, LLC. The NCP plant specializes in a range of precast products, such as de-nitrification systems, residential steps, and specialty architectural projects that will allow Gillespie to offer even more state of the art precast solutions.

The acquisition increases Gillespie’s service expertise, as like Gillespie, NCP has over 30 years’ experience in precast technologies residential, municipal and commercial. NCP is Delaware & Maryland State Highway Certified to produce precast structures and meets the NPCA – (National Precast Concrete Association) plant certification quality control program.
